

# DCS5000Eth Auditron

## Description

Ethernet Auditrons represent our latest development in Access Control devices. By integrating Ethernet connectivity into this already versatile device, administrators can now manage staff access remotely using existing computer cabling. Ethernet connectivity means faster communication between units and more control for administrators.

## Features:

- ✦ Compatible with all B/W & Colour photocopier makes & models
- ✦ Time and date stamping now available as standard
- ✦ Records separate A4 / A3 & B/W / Colour etc. price lines for more detailed analysis and cost recovery. Up to 8 price lines (dependent on device type)
- ✦ High Speed Ethernet data retrieval. In-built TCP/IP protocol allows centralised control across organisation's LAN or WAN
- ✦ Supports three field numeric PIN entry up to 30 digits each. Magnetic Stripe card option available.
- ✦ Day to day operation not reliant on network. TCP/IP & RS485 network, & RS232 direct connection support built-in. Non-intrusive communication protocol. Ethernet Auditrons do not require access to network services
- ✦ Dynamic memory allocation and increased capacity enables over 10,000 accounts to be kept. Battery back-up retains account information for up to 10 years

### Quick Look at APR 3.0

- Maintains central user database
- Customised reports able to be exported in pdf, text, HTML etc
- PINs associated to alphanumeric descriptors for more meaningful reports
- Manages both TCP/IP and standard RS-232 units
