

AuditPro Reporter

Description

A 32 bit Windows application with friendly Graphical User Interface (GUI), allowing you to manage a fleet of Auditrons and report on copier usage from either Standard or Ethernet Auditron readers.

Features:

- ✦ Maintain a database of users, cost codes, department codes, work groups, strata codes, or matter numbers providing a centralised information store.
- ✦ Implement controls by limiting accounts (copy-click, debit, or credit).
- ✦ Provision for organising the data keyed into the Auditrons to mimic the hierarchical structure of the organisation or institute.
- ✦ Assists in creating Auditron download profiles, isolating and limiting the machines certain users have access to.
- ✦ Harnesses the speed and versatility of existing Ethernet networks to download usages and/or update users, cost codes etc. Also supports 'Direct Connect' for machines not serviced by network points.
- ✦ Downloads may be automated to coincide with off-peak times, avoiding additional load on the network.
- ✦ Password protection provides the ability to implement security levels restricting database manipulation, report generation, and machine downloads.
- ✦ Print comprehensive user reports or export information to text, HTML, Lotus 123, Excel, or Word files. (Customised formats or reports are available upon request)
